

WEST

WELSH ENERGY SECTOR TRAINING

PRACTITIONER'S FOCUS GROUP

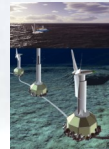

Monday, 23rd April 2012
8 - 10.45am

Liberty Stadium, Swansea

The WEST Project's objective is to develop the skills to aid the utilisation and uptake of emerging low carbon technologies through the LCRI. Through the focus group we would like to gain an understanding of what practitioners need regarding energy sector training.

Your views matter. Your responses to this consultation will be considered closely, and will inform the continuing development of our strategy to ensure that Wales has the people with the skills needed not simply to respond to but to capitalise on the move to a low carbon economy.

If you would like to join us or require any further information, please contact Kate Nash (NashK3@cardiff.ac.uk or 029 2087 0263)

PROGRAMME
